

Home Learning Activities

Miss Tiplady and Miss Clark's Class

3rd June 2020

Miss Clark and I hope you enjoyed half term last week. I spent a lot of time gardening planting some of the plants that I'd grown in my greenhouse. Here's Harry in my garden. Can you see how much he's grown?

Home Learning Ideas

If you want more ideas for home learning visit the Oak National Academy at:

<https://www.thenational.academy/online-classroom>

There are ideas for home learning in subjects such as English, Maths, Science, PE and RE.

Maths Challenges

Look at White Rose Maths challenges at: <https://whitrosemaths.com/homelearning/year-2/>

Maths activities

Visit this website: <https://www.thenational.academy/year-2/maths/to-be-able-to-read-the-temperature-on-a-thermometer-year-2-wk6-1>

The activities I suggest you complete are the ones about reading the temperature on a thermometer. There are fun quizzes for the children to complete as well as videos to watch to help children with their learning.

Literacy Challenges

As part of the literacy activities this week I suggest that you use the Oak National website: <https://www.thenational.academy/year-2/english/the-firework-makers-daughter-to-retrieve-information-year-2-wk6-1>

The first suggested literacy lesson is based on the book *The Firework Maker's Daughter* written by Philip Pullman. The activity is based on reading the first few pages of the book and focusing on retrieving key information from the text. All you will need is a piece of paper and a pencil to complete the lesson. There are other suggested lessons for the rest of the week based on the same book.

Art Challenges

'View From My Window'

Many famous artists past and present have painted pictures of a view from their window. This is a painting by the artist Matisse. Can create your own painting or drawing from a view from one of your windows? Research some interesting facts about this artist as well as finding other examples of paintings that he created?
