Which of these have one half shaded?

**Make sure you are completing work in the White Rose workbooks from school.**

Continuing our work on money, can you find the correct number of 1p coins to make the other coins. Can you make different amounts such as 4p or 6p using the coins we have?

Could you set up a toy shop in your house and make price labels for things. Then can you get someone to come and buy something from your shop? Add up the things they buy?

Can you work out how much change someone would need by taking away? Don't make your prices bigger than 20p so it is not too tricky.

Keep practising counting to 100.
